EDUCATION

University of Utah   August 2022 - Present
Ph.D. in Computer Science
Advisor(s): Dr. Jacobus (Kobus) Van der Merwe

Lahore University of Management Sciences (LUMS)   September 2018 - July 2020
Masters in Computer Science
Advisor(s): Dr. Zafar Ayyub Qazi and Dr. Taqi Raza

COMSATS, Lahore   February 2013 - June 2017
Bachelors in Software Engineering
Advisor(s): Dr. Salman Khan

PROFESSIONAL EXPERIENCE

Nokia Bell Labs, Murray Hill   June 2024 - August 2024
Research Intern

- Worked on co-optimizing RAN resources and edge server parameters to improve connectivity for
  next-generation mobile applications.

Zong Research Lab - LUMS   July 2020 - July 2022
Research Assistant

- Designed and developed a machine learning-based system to detect control-plane attacks in 5G
  core network.

- ○ Designed and developed a novel 5G core network to improve control-plane latency under failures by **3.8x**.
- ○ Designed and developed a geo-aware load balancer that reduces the handover completion times by **17x** in the 5G control-plane.

Zong Research Lab - LUMS February 2019 - June 2020
Research Assistant

- ○ Performed serialization of 5G NAS procedures with **ASN.1** and **Flatbuffers** schemes and compared their encoding/decoding times.
- ○ Designed a fast packet processing system leveraging **Intel's fifth generation** user plane function and improved the user-perceived latencies by up to **10x**.

COMSATS, Lahore October 2017 - August 2018
Software Engineer

- ○ Designed and developed a **plagiarism detection** module for university assignments using a novel **string matching** algorithm.
- ○ Designed and developed a **graph-based semantic similarity** for finding structural similarity of C/C++ source codes using **Clang** compiler APIs.

SELECTED PROJECTS

- **Computation Offloading:** Conducted a feasibility study of computation offloading of multiple IoT applications under **Edge computing** paradigm.
- **Panorama Generator:** Developed an Android and web-based solution for panoramic pictures creation using Computer vision concepts.
- **Bitcoin Miner:** Developed a distributed system that mimics the **Bitcoin's** mining algorithm.
- **Paxos:** Developed a fault-tolerant, distributed algorithm for reaching consensus using Golang.
- **OLAP Cube:** Created an approach for multi-dimensional data analysis using a Java-based automatic query builder.
- **High-performance numerical library:** Developed a high-performance matrix multiplication library for multi-core CPU and GPU using OpenMP and CUDA, respectively.

TEACHING EXPERIENCE

- Graduate T.A. for Computer Networks (CS 4480), University of Utah Spring, 2023

AWARDS

- Received **Outstanding Innovation Award** at Nokia Bell Labs for the internship project.
- Awarded AERPAW 2023 workshop student travel support. Link to the workshop: https://aerpaw.org/
- Awarded departmental Fellowship at the University of Utah.
